Stalette Mobile Handwash

A high capacity, powered, free standing hand wash unit with an electronic sensor

Being entirely self-contained, the Super Stallette portable basin can be sited anywhere as it needs only a 13 amp socket outlet for operation. No plumbing or drainage is required.

The Super Stallette+ has a lightweight, easy to clean and robust body. The Super Stallette+ delivers a 10 second hot wash in a low pressure spray. Supplied complete with TEAltainer.

Hands free: placing your hands in the bowl triggers the wash cycle and the unique *Bluesensor* will start to flash indicating that the water is being heated to the required temperature of 40°C +/- 2°C.

The Super Stallette+ will then deliver the 10 second hot wash in a low pressure spray, ideal for hand washing under running water. When removing your hands from the bowl, the *Bluesensor* will re-light, showing that it has reset and is once again ready for use.

10 litres capacity, provides up to 50 washes. 230V mains, freestanding, auto-sensor.
